Introducing 1st time in Pakistan

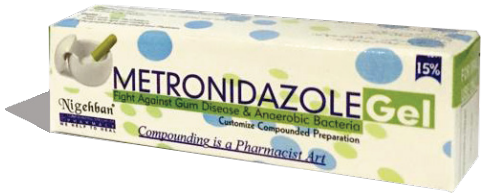
METRONIDAZOLE

Extemporaneous Oral / Periodontal GEL

15% 20% 25% 30%

Fight Against Anaerobic Bacteria

Topical (Metronidazole) Gel Best Choice For Periodontitis



- Works specifically on the anaerobic flora associated with periodontitis.
- Has the best bactericidal activity & active against anaerobic bacteria.
- Confidence from a well-documented antibiotic Metronidazole.
- Sustained, Localized action.
- Reduced risk of any of the side effects encountered by systemic therapy.
- Reduces the problem of poor patient compliance due to short treatment time.

Indications:

■ Gingivitis ■ Periodontitis ■ Chronic Periodontitis
■ Infections Of Oral Mucosa ■ Sore Throat ■ Apthous Ulcer
■ Dry Sockets ■ Periodontal Pockets ■ Oral Candidiasis
■ Peri-Implantitis ■ Denture Ulcer

Pregnancy And Lactation

This formulation should not be prescribed in the first trimester of pregnancy. During the lactation period it is necessary to discontinue breast feeding.

Contraindication: Hypersensitivity To Metronidazole.

Oral Lichen Planus

Lichen Planus in the mouth may appear as white or red patches, white streaks, ulcers or painful red gums. It may not always cause symptoms while spicy, acidic and hard food results in soreness. After appearing it is often present for life.

Clobetasol Oral Gel

Clobetasol (0.05%) in oral adhesive gel

Tacrolimus Oral Gel

Tacrolimus (0.1%) with Misoprostol (0.002%) in oral adhesive gel Cyclosporine (1%) in oral adhesive gel

Muco Adhesive Gel v/s Ointment

The gel based muco-adhesive product results in high penetration with high absorption and efficacy.

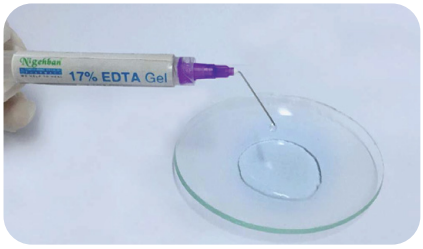
- Long lasting.
- Easy spread-ability to cover large areas.
- Absorbed easily & only leave behind a thin film from the thickening agent.

First Time Introduced In Pakistan

Endodontic

17% EDTA Gel

For Root Canal Cleaning & Removal Of Smear Layer



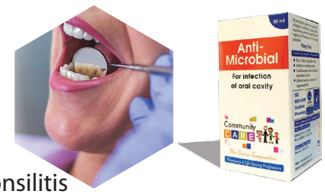
Optimum Flow With Minimum Wastage & Cost Effective

- ✔ Gel reduces risk of instrument fracture in canal.
- ✔ Gel is firm at room temperature.
- ✔ Adheres well to the working instrument.
- ✔ Disperses well inside the root canal.

Anti-Microbial
Mouth Wash

√ Doxycycline √ Prednisolone √ Lignocaine

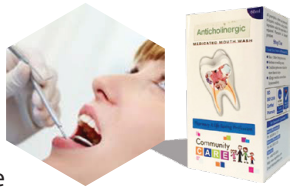
Indications:
- Severe Oral Infection Periodontitis
- Trauma to Oral Mucosa
- Aphthous Ulcer
- Pharyngitis, Laryngitis & Tonsilitis



Anti-Cholinergic
Mouth Wash

√ Atropine

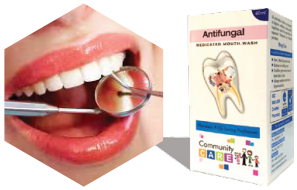
Indications:
- Temporary reduction of salivary flow
- Use during dental procedures in hypersalivation
- Stroke and Parkinson's Disease



Anti-Fungal
Mouth Wash

√ Nystatin

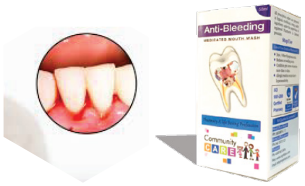
Indications:
- Candidiasis(Oral Thrush)
- Denture Induced Stomatitis
- Angular Cheilitis
- Median Rhomboid Glossitis



Anti-Bleeding
Mouth Wash

√ Tranexamic Acid

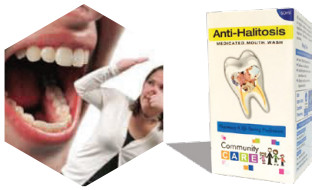
Indications:
- Prevent Bleeding after Oral/Dental Surgery
- After extraction specially in patients with blood diseases (Haemophilia)



Anti-Halitosis
Mouth Wash

√ Sodium Chloride √ Zinc Chloride √ Menthol

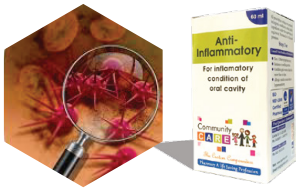
Indications:
- Diabetes patient
- Use as mouth freshener
- In pregnancy
- In menstruation
- Liver Disease



Anti-Inflammatory
Mouth Wash

√ Misoprostol √ Antacid √ Lignocaine

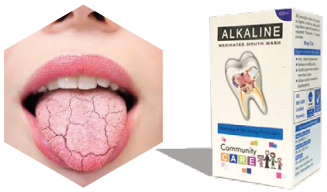
Indications:
- Recurrent Aphthous Ulcer
- Burning Mouth Syndrome
- Pharyngitis, Laryngitis & Tonsilitis



Alkaline
Mouth Wash

√ Sodium Bicarbonate √ Sodium Chloride

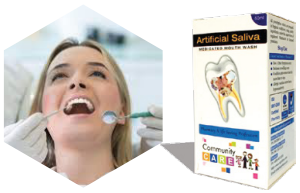
Indications:
- Dental Erosion
- Xerostomia
- Oral Ulcerative Disease



Artificial Saliva
Mouth Wash

√ Same as Saliva √ Including Fluoride

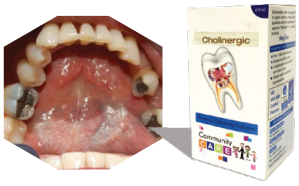
Indications:
- For patients in which salivary glands secretion completely deficient.



Cholinergic
Mouth Wash

√ Pilocarpine

Indications:
- Sjogren's syndrome.
- Dry mouth due to radiation therapy of head and neck.
- Decrease salivary flow due to any reason



Fluoride
Mouth Wash

√ Hydrogen Peroxide √ Sodium Fluoride

Indications:
- Help to relief minor mouth irritation such as ulcers and gum inflammation.
- Moderate to high risk dental caries patients.

For The Love Of
Teeth & Oral Hygiene
