Pharmacy A life Saving Profession

Exclusive Treatment Option As Per Individuals Requirement

Introducing 1st time in Pakistan

METRONIDAZOLE

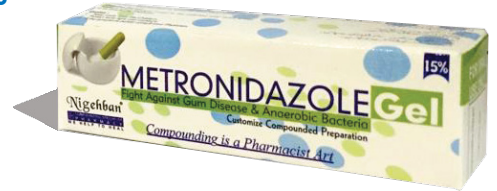

Extemporaneous Oral / Periodontal GEL

15% 20% 25% 30%

Fight Against Anaerobic Bacteria

Topical (Metronidazole) Gel Best Choice For Periodontitis

- Works specifically on the anaerobic flora associated with periodontitis.
- Has the best bactericidal activity & active against anaerobic bacteria.
- Confidence from a well-documented antibiotic Metronidazole.
- Sustained, Localized action.
- Reduced risk of any of the side effects encountered by systemic therapy.
- Reduces the problem of poor patient compliance due to short treatment time.

Indications:

- Gingivitis ■ Periodontitis ■ Chronic Periodontitis
- Infections Of Oral Mucosa ■ Sore Throat ■ Aphthous Ulcer
- Dry Sockets ■ Periodontal Pockets ■ Oral Candidiasis
- Peri-Implantitis ■ Denture Ulcer

Pregnancy And Lactation

This formulation should not be prescribed in the first trimester of pregnancy. During the lactation period it is necessary to discontinue breast feeding.

Contraindication: Hypersensitivity To Metronidazole.

Oral Lichen Planus

Lichen Planus in the mouth may appear as white or red patches, white streaks, ulcers or painful red gums. It may not always cause symptoms while spicy, acidic and hard food results in soreness. After appearing it is often present for life.

Clobetasol Oral Gel

Clobetasol (0.05%) in oral adhesive gel

Tacrolimus Oral Gel

Tacrolimus (0.1%) with Misoprostol (0.002%) in oral adhesive gel Cyclosporine (1%) in oral adhesive gel

Muco Adhesive Gel v/s Ointment

The gel based muco-adhesive product results in high penetration with high absorption and efficacy.

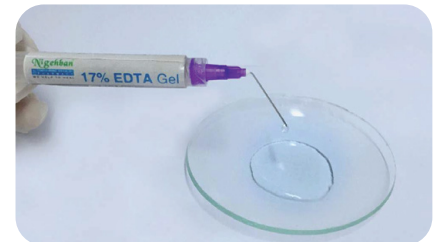

- Long lasting.
- Absorbed easily & only leave behind a thin film from the thickening agent.
- Easy spread-ability to cover large areas.

First Time Introduced In Pakistan

Endodontic

17% EDTA Gel

For Root Canal Cleaning & Removal Of Smear Layer

Optimum Flow With Minimum Wastage & Cost Effective

- ✓ Gel reduces risk of instrument fracture in canal.
- ✓ Adheres well to the working instrument.
- ✓ Gel is firm at room temperature.
- ✓ Disperses well inside the root canal.
